

Spezialfittings – Special fittings – Raccords spéciaux Übergangsstücke – Adapters – Adaptateurs

**max. 2000 bar
max. 30 000 PSI**

Fittings in korrosionsbeständigen Werkstoffen

- Hochdruckfittings und Übergangsstücke mit mediumberührtem Einsatz in korrosionsbeständigen Werkstoffen. Max. Mediumstemperatur: 200°C.
- In der bewährten SITEC-Schrumpfkonstruktion sichert der Einsatz aus dem gewählten Werkstoff die Korrosionsbeständigkeit und der hochfeste Körper in W.-Nr. 1.4571 die Druckfestigkeit der Einheit.
- Relativ weiche, aber äusserst korrosionsbeständige Werkstoffe können dank dieser Schrumpfkonstruktion auch bei hohen Drücken eingesetzt werden.
- Werkstoffe der Einsatzes:
Hastelloy C4 – Hastelloy C276 – Hastelloy C22 – Monel – Hastelloy B2 – Titan – Inconel – Nimonic.
- Weitere Werkstoffe auf Anfrage.
- Fittings in korrosionsbeständigen Werkstoffen sind entsprechend den Katalogblättern 720.01–720.05 erhältlich.
- Zur Bezeichnung von Fittings in korrosionsbeständigen Werkstoffen wird die Artikelnummer des Standardfittings mit dem Kurzzeichen des gewählten Einsatzwerkstoffes ergänzt, z.B. 720.1433-HC4.

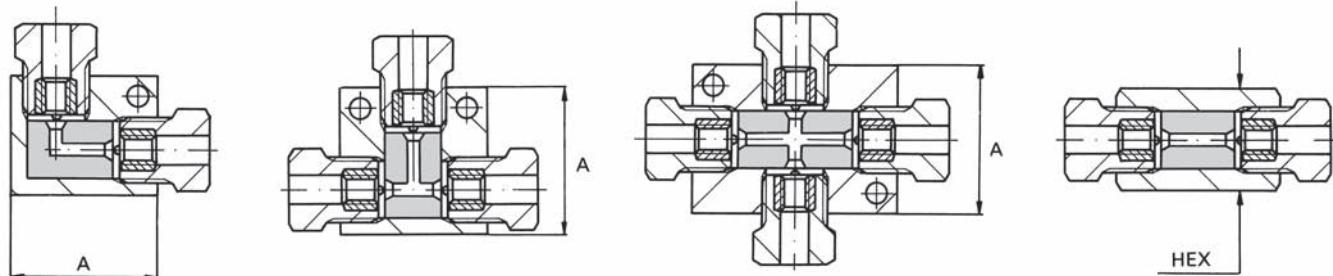

Raccords en matériaux résistants à la corrosion

- Raccords et adaptateurs haute pression avec le noyau en contact avec le fluide en matériaux résistants à la corrosion.
- Avec la construction frettée SITEC l'insert au matériau choisi assure la résistance à la corrosion tandis que le corps externe en ZG CNDT 17.12 à haute résistance mécanique maintient la pression. Température du fluide max.: 200°C.
- Avec cette construction frettée même des matériaux très doux à haute résistance à la corrosion peuvent être appliqués sous hautes pressions.
- Matériaux des inserts de raccords:
Hastelloy C4 – Hastelloy C276 – Hastelloy C22 – Monel – Hastelloy B2 – titane – Inconel – Nimonic.
- Autres matériaux à la demande.
- Raccords en matériaux résistants à la corrosion selon les pages 720.01–720.05 du catalogue haute pression.
- Pour désigner les raccords en matériaux résistants à la corrosion, veuillez ajouter l'abréviation du matériau choisi à la référence du raccord standard, p. ex. 720.1433-HC4.

Fittings and Adapters in corrosion-resistant materials

- High-pressure fittings and adapters with all wetted parts in corrosion-resistant materials. Max. fluid temp.: 200°C.
- With the reliable SITEC double wall design, the insert in the chosen material ensures corrosion resistance and the high-strength body in AISI 316Ti secures the pressure resistance of the unit.
- With this double wall design, relatively soft, but extremely corrosion-resistant materials may also be applied with high pressures.
- Available fitting insert materials:
Hastelloy C4 – Hastelloy C276 – Hastelloy C22 – Monel – Hastelloy B2 – titanium – Inconel – Nimonic.
- Other materials available on request.
- Fittings in corrosion-resistant materials are available according to the catalogue pages 720.01–720.05.
- To specify the corrosion-resistant fitting, the abbreviation of the chosen material is used as a suffix to the Part Number of the standard fitting, for example 720.1433-HC4.
